Definition Solution Biology A solution is a homogeneous mixture of solvent and solute molecules. A solvent is a substance that dissolves another substance by pulling the molecules apart through electrochemical interactions. The solute then diffuses through the solvent until the concentration is equal in all parts of the solution. A solution can be liquid, solid, or gaseous. Solution - Definition, Types and Examples | Biology Dictionary Definition noun, plural: solutions A type of homogenous mixture in which the particles of one or more substances (the solute) are distributed uniformly throughout another substance (the solvent).

Supplement A solution typically consists of the dissolved material called the solute and the dissolving agent called the solvent . Solution Definition and Examples - Biology Online Dictionary A solution is a type of homogeneous mixture that is made up of two or more substances. Biology ... A solution is a homogeneous mixture of two or more substances. A solution may exist in any phase. A solution consists of a solute and a solvent. The solute is the substance that is dissolved in the solvent. Solution Definition in Chemistry - ThoughtCo Solution, in chemistry, a homogenous mixture of two or more substances in relative amounts that can be varied continuously up to what is called the limit of solubility. The term solution is commonly applied to the liquid state of matter, but solutions of gases and solids are possible. solution | Definition & Examples | Britannica solution [ sə-lōō 'shən ] Chemistry A mixture in which particles of one or more substances (the solute) are distributed uniformly

throughout another substance (the solvent), so that the mixture is homogeneous at the molecular or ionic level. The particles in a solution are smaller than those in either a colloid or a suspension. Solution | Definition of Solution at Dictionary.com A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent. The particles of solute and solvent are molecules or ions, with one or more solvent molecules bound to each solute particle. Solution - definition of solution by The Free Dictionary In chemistry, a solution is a special type of homogeneous mixture composed of two or

more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation. Solution - Wikipedia A solution is a liquid or solid which is made by dissolving a solid, liquid, or gas in the pure liquid or solid. A solution which does not dissolve any more solute is described as being supersaturated. When the solvent has dissolved as much solute as it can, it is a saturated solution.
