Linux typically is a single user OS.
The single user is run as the root
account with full privileges. This is
equivalent to being the
administrator in Windows. That is
there is no file a user can't modify
(unless its read only) and no
command that is prohibited. Root,

Spot and Fido user accounts -
Puppy Linux It was originally forked from Puppy Linux 4.0, but it has since taken a different path (of doing the same thing). Like DebianDog and Quirky, however, it is considered as part of the Puppy Linux family. About the Puppy Linux Team. Q: First you say the Puppy Linux Team has no organisation. Then you talk about stewards. Puppy Linux Frequently Asked Questions (FAQ) To install Puppy Linux, you'll first need to boot from the ISO image you just downloaded. This means you'll need to create a bootable CD, DVD, or USB drive containing the ISO file. CD/DVD: To burn an optical disc in Windows 10, right-click the downloaded ISO file and select Burn disc image. How to Install Puppy Linux (with Pictures) - wikiHow Dec
