pdf free wound assessment documentation example  
manual pdf pdf file

Wound Assessment Documentation Example “WOUND PICTURES” (adapted from Hess 2004) organizes key aspects of wound assessment that should be documented (Box 1). Each item can further be described as either qualitative (descriptive) and/or quantitative (measurable). An example is wound drainage or exudate colour, consistency and odour (qualitative) and amount (quantitative). Wound Measurement, Assessment and Documentation - Swift The term “packed” is a common example of a wound assessment documentation term often used in healthcare facilities and in the courthouse. If a wound gets worse or fails to heal, lawyers may argue that the clinician packed the wound too tightly, causing additional damage. Tips for Wound Care Documentation | Relias Various assessment tools are available to help with recording a wound’s condition and progress if a local tool is not available. Examples include HEIDI, TIME, TELER (Box 3) and Bates-Jensen. All assist with accurate documentation and nurses should use the one required by local policy or select the one that best suits the needs of the patient. Wound management 4: Accurate documentation and wound ...
